

## Fundamentals in Ophthalmology: Veterinary Ophthalmology for the General Practitioner

- What you need to know about the commonest diseases you will see in dogs and cats

### KURSBESKRIVNING

Teoretisk 2-dagarskurs för smådjursveterinärer.

Ansökan är inskickad för att få kursen tillgodoräknad i specialistutbildning steg 1.

Speaking with knowledge and comfort about a subject like ophthalmology when you are a general practitioner is important, not only for yourself but for the owners who trust you and need to follow your advice. This course aims at giving you the structure you need to find that support.

This course is intended to offer a wide and generous support to you, the general practitioner, to prepare you for when you see an eye case. The course is designed to start in a step-by-step approach.

### KURSINNEHÅLL

- How to perform an ophthalmic exam and what are the limitations in General Practice
- Entropions in dogs and cats – making the complex a little simpler
- Common eyelid and third eyelid diseases and how to treat some of them
- The cornea; - How the cornea responds to disease and understanding the rationale for corneal treatment
- Corneal ulcer that needs surgery, and when to refer it so that it is not too late
- Other corneal diseases you can deal with in general practice
- Cataracts – Do they cause ocular health problems? Why? Should I refer cataracts? How do I explain this to an owner?
- Glaucomas – Unraveling some of the mysteries around this disease and how to explain to owners the treatment and prognosis.

### FÖRELÄSARE

#### **Rick F Sanchez**

BSciBiol, DVM, CertVOphthal, DipECVO, FHEA

Rick commenced his veterinary specialty training in the US in 1999, and in 2002 moved to Barcelona to obtain a European veterinary qualification. He completed his residency training in ophthalmology at the University of Glasgow and the Eye Veterinary Clinic in the UK in 2005. Then, he headed the ophthalmology service in a private practice until late 2011 when he joined the Royal Veterinary College (RVC) of the University of London to establish and direct the Ophthalmology Service and an ECVO Ophthalmology Residency program. He returned to private practice and settled in Holland (Specialistische Dierenkliniek Utrecht - SDU) in 2017. Rick lectures around the world, is an Editorial Board Member of the Veterinary Ophthalmology journal since 2010, and has active research interest in the cornea, corneal surgery, cataract surgery and glaucoma.
